TL23 Series Laboratory Turbidimeters

The TL23 Series benchtop turbidimeters for a wide range of turbidity applications feature the trusted technology of Hach's legacy benchtop turbidimeters and improved functionality to simplify testing. These features include a colour touch screen, a USB port for data transfer, self-diagnostics for quality assurance, and single point calibration for measurements under 40 NTU/FNU.

The TL23 Series benchtop turbidimeters are available in four different models: two models with tungsten lamp at 460 nm, and two models with LED light source at 860 nm.
