AT1000 & KF1000 Application Packs

Application Packages for use with Titralab 1000 Series titrators from Hach contain all elements except reagents to make it quick and easy for everyone to set up and operate a test. Each Application Package is specifically designed for unique parameters to ensure accurate and reproducible measurements at a glance, including*:

• Adapters

• Glass bottle

• Magnetic stirring bars

• Polypropylene beakers

• Bottle stopper with desiccant tube

• Electrode(s) (Digital Intellical or Analogue)

• High precision glass syringe (Hamilton)

• USB key containing application notes and applications to automatically program titrators for selected parameters.

Setting up your application has never been so simple.

* Application package content varies depending on application/parameters.
