MultiRAE Benzene

Wireless Portable Six-Gas Monitor With Benzene-Specific Measurement

The MultiRAE Benzene is the only gas monitor that includes up to 6-gas¹ detection and real-time wireless capability, plus benzene-specific measurement.

The MultiRAE Benzene monitor combines the ability to make quick benzenespecific assessment ("snapshot") measurements² with the advantages of a versatile multi-gas monitor that can support approximately 20 intelligent interchangeable sensor options.

Its optional wireless capability improves safety by providing real-time access to instrument readings and alarm status from any location, which delivers better situational awareness and faster incident response.

The MultiRAE Benzene monitor's unique features make it an ideal instrument for industrial applications, from confined space entry pre-screening during plant maintenance to personal protection, leak detection and refinery downstream monitoring.
