Sensepoint

Honeywell

The Sensepoint range of flammable, toxic and Oxygen gas detectors offers users a cost-effective solution to their gas monitoring needs

Sensepoint

The Sensepoint range of flammable, toxic and Oxygen gas detectors offers users a cost-effective solution to their gas monitoring needs, in or out of doors and even in potentially explosive atmospheres. Supplied with a pre-wired junction box, this detector can be installed using conduit or armoured cable and glands depending on the specific needs of the application.

One-Stop Shop
- Flammable, toxic and Oxygen versions available
- Suitable for indoor or outdoor use
- IP65 as standard

Proven Sensor Technology
- Surecell™ electrochemical sensors
- Poison resistant catalytic bead
- Fast and reliable
- Typical 2 to 5 years operational life

ATEX Certified
- Complies with the latest European standards
- Hazardous area and performance approvals
- Can be used for uncertified applications

Easy to Use
- Factory set operation
- Simple sensor replacement
- Minimal training required

Friendly Installation
- Universal junction box
- One box, three entries
- Metric and NPT compatibility
- Includes earth continuity plate for enhanced protection against RFI

Range of Accessories
- Weather Housing (IP66)
- Flow adaptor
- Collecting cone

Sensepoint flammable and toxic gas detectors are designed for use in potentially explosive atmospheres, and allow for easy access to terminals via the hinged lid of the junction box. Installation should follow national guidelines using suitably approved armoured cable and glands or conduit.

Supplied with an earth continuity plate for increased resistance to the effects of RFI, the junction box offers the installer a choice of ½", ¾" and M20 connection via conduit or armoured cable and Ex e certified cable glands. Terminals are suitable for use with screened 0.5mm^2 (20AWG) to 2.5mm^2 (14AWG) cross sectional area cable, as needed to ensure minimum operating voltage at the detector, depending upon installed cable length.

Sensepoint flammable, toxic and Oxygen gas detectors are designed for direct connection with the Honeywell Analytics' range of Touchpoint controllers.
Contact Honeywell Analytics for details.

Dimensions

Sensepoint flammable and toxic gas detectors offer multiple cable entry sizes as standard and allow for quick and easy installation via the hinged lid of the junction box.

The junction box is suitable for mounting onto any suitable flat surface able to support the weight of the unit such that when installed, the sensor is in a downward position. For ceiling mounting an optional bracket is available to allow for this.
Cable can be entered into the junction boxes via a gland or conduit through one or more positions in the top or sides of the unit.

Applicable standards	This product complies with the relevant CE standards including: EMC to EN50270, Flammable to EN60079-29-1, Toxic to EN445544 (H$_2$S only)		

Environmental

IP rating	IP65 standard, IP66 with weather protection in accordance with EN60529:1992
Operating temperature	Dependent upon gas type and certification
Operating humidity range	Continuous: 20-90% RH (non condensing), Intermittent: 10-99% RH (non condensing)
Operating pressure	90-110kPa
Storage conditions	Instrument -40°C to +50°C (-40°F to +122°F)

*Oxygen detection products must only be used to detect Oxygen depletion in air

Our Product Range

Fixed Gas Monitoring

Honeywell Analytics offers a wide range of fixed gas detection solutions for a diverse array of industries and applications including: Commercial properties, industrial applications, semiconductor manufacturers, energy plants and petrochemical sites.

» Detection of flammable, Oxygen and toxic gases (including exotics)

» Innovative use of four core sensing technologies – paper tape, electrochemical cell, catalytic bead and infrared

»
   Billion (ppb) or Percent by Volume (%v/v)

   Cost effective regulatory compliance

Portable Gas Monitoring

When it comes to personal protection from gas hazards, Honeywell Analytics has a wide range of reliable solutions ideally suited for use in confined or enclosed spaces. These include:

» Detection of flammable, Oxygen and toxic gases

» Single gas personal monitors – worn by the individual

» Multi-gas portable gas monitors – used for confined space entry and regulatory compliance

» Multi-gas transportable monitors – used for temporary protection of area during site construction and maintenance activities

Technical Services

At Honeywell Analytics, we believe in the value of great service and customer care. Our key commitment is providing complete and total customer satisfaction. Here are just a few of the services we can offer:

» Full technical support

» Expert team on hand to answer questions and queries

» Fully equipped workshops to ensure quick turnaround on repairs

» Comprehensive service engineer network

» Training on product use and maintenance

» Mobile calibration service

» Customised programmes of preventative/corrective maintenance

» Extended warranties on products
